

Bayside Montessori School Inc.

2019

Dear Parents,

Our school has made the commitment to develop an outstanding and internationally accredited Montessori academic program through the senior kindergarten level.

The children who grow up in a Montessori school like ours tend to be quite different from students usually found in other schools. This difference is not simply in what they know and what they can do; it lies in their attitude and approach to learning and to life.

Montessori children are normally enthusiastic learners. They look upon their teachers as mentors, guides and friends. They have held on to the curiosity, creativity and imagination that most children bring into the world. Unlike many school children, they don't see school as boring, or schoolwork as a burden. They are generally not fearful, or sarcastic and cynical to their friends on the playground. I like to call them joyful scholars.

Students like ours simply never can be replaced. Our school clearly needs them, and hopefully you as their parents can see what they are capable of becoming, and that is why you have chosen to look into sending them to Bayside Montessori School.

Our students grow up together in an atmosphere of warmth, kindness and respect. They bond quite closely to our school, their teachers and their friends. We become a community.

Most children watch their friends come and go from their lives. One of our goals is to create a community of substance and depth, to gather together a group of parents, children and teachers who share common values and form lasting friendships.

We are all looking for what will be best for our children and I imagine that some of you may be concerned whether Montessori will actually prepare your children well for the real world.

As a Montessorian of 30 years and a parent of a former Montessori student, I know that the answer is a resounding yes!

We ask that you fill out the questionnaire included with this letter if you wish to visit our program. Please follow the directions found on the questionnaire and return it to us as soon as possible.

Sincerely,

Melissa Coy
